Laverton South Project

- 100% owned Lake Yindana E28/2659
- JV with St Barbara in the Pinjin area (E79 earning to 51% by \$310,000 expenditure, +29% for \$500,000 expenditure)
- Recent + 1Moz discovery at Bombora
- Recent +1Moz discovery at Rebecca / Duchess

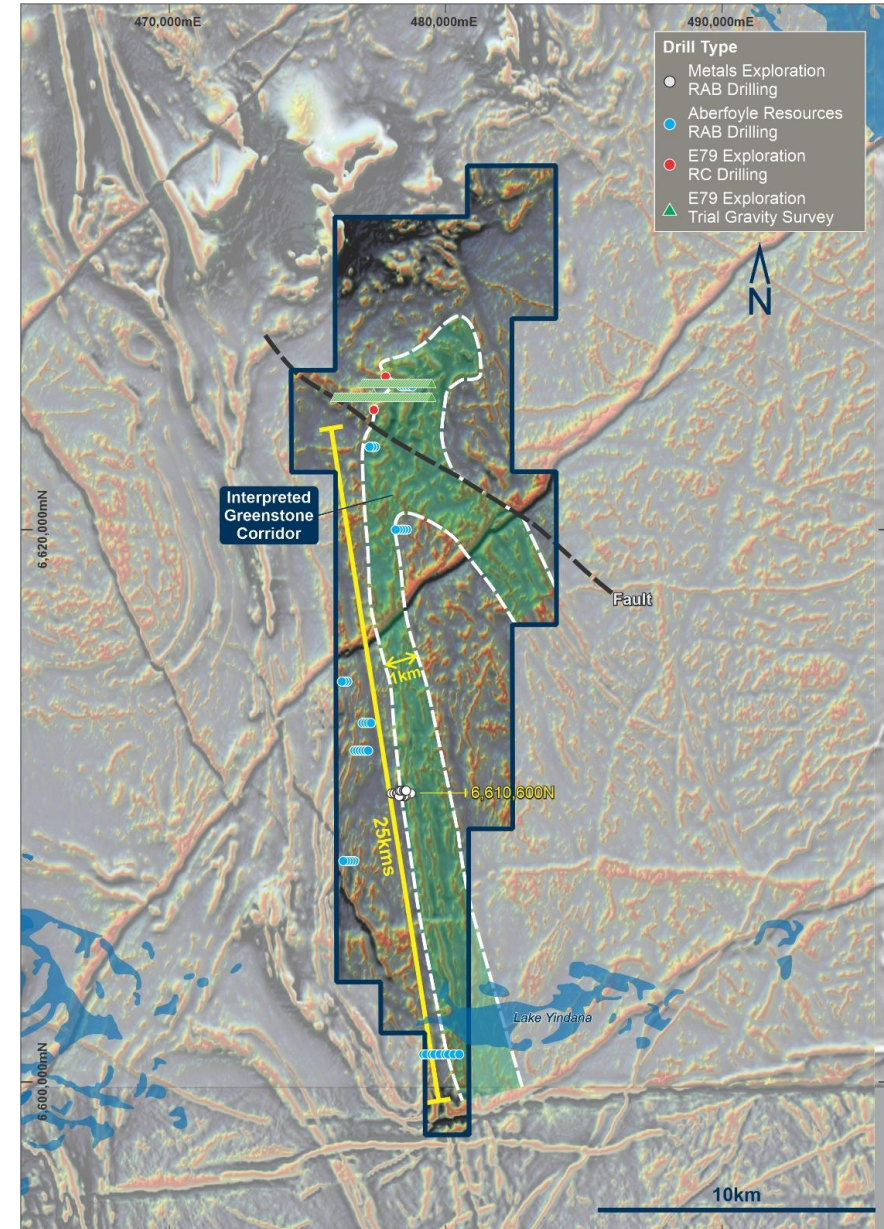

Laverton South Project – Lake Yindana

-  First-mover opportunity
-  GSWA maps show the tenement is less prospective granite (not correct)
-  Discouraged historic exploration – only 65 RAB drill holes, huge areas not explored

Laverton South Project – Lake Yindana

- Magnetics and recently acquired gravity clearly show that the tenement is underlain by ~25km of greenstones
- This is supported by the limited historic RAB drilling finding various lithologies:
 - Dolerite
 - Gabbro
 - Gneiss (Rebecca host)
 - Ultramafic (Ni prospective)
 - Rhyolite porphyry
 - Granite

Laverton South Project – Lake Yindana

Multiple targets

Greenstone

- ~25km long
- underexplored

Potential intrusions

- Identified from the recent gravity
- Intrusion and pressure shadows

Laverton South Project – Lake Yindana

-  Magnetics and gravity clearly show that the tenement is underlain by ~25km of greenstones
-  Given the distinct lack of previous exploration, effectively E79 has a 'first-mover' opportunity:

'...the largest deposits in any particular search space are usually found early because they generally have the most obvious signatures.' And '...the key to exploration success is being the first, or very early, into a new search space'. Dr Jon Hronsky

Laverton South Project - St Barbara JV

-  A series of tenements along strike north and south of the Anglo Saxon (Trouser Legs) Gold Mine, Pinjin Goldfield
-  In conjunction with the Lake Yindana tenement, the tenure controls the north and south strike extensions of the Rebecca / Duchess discoveries

Laverton South Project - St Barbara JV

-  A series of tenements along strike north and south of the Anglo Saxon (Trouser Legs) Gold Mine, Pinjin Goldfield
-  Gold found within Pinjin Shear, on contact between felsic volcanic sediments and intermediate schist

Mineral Resources: 796,000 t at 6.1 g/t Au for 157,000 ounces
(Hawthorn Resources ASX 30/10/2020)

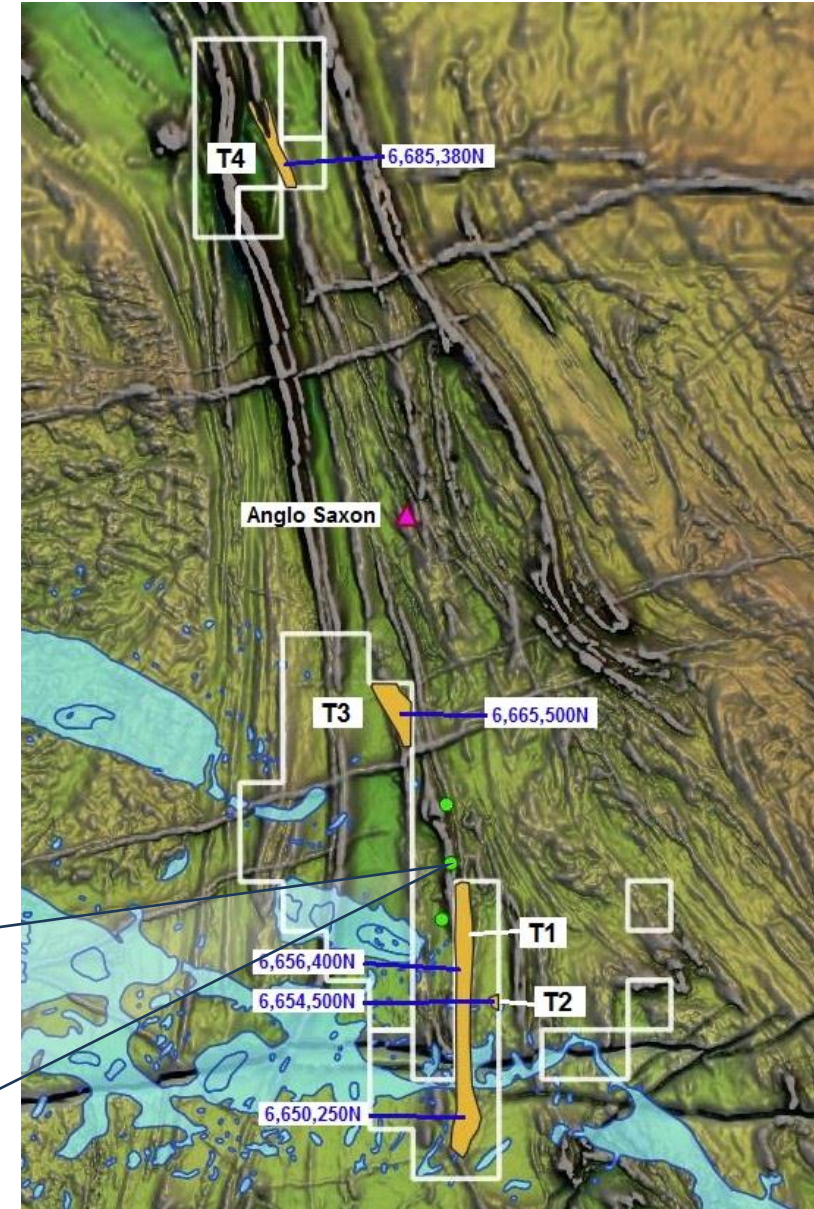

Laverton South Project - St Barbara JV

Targeting completed by St Barbara –
walk-up drill targets including

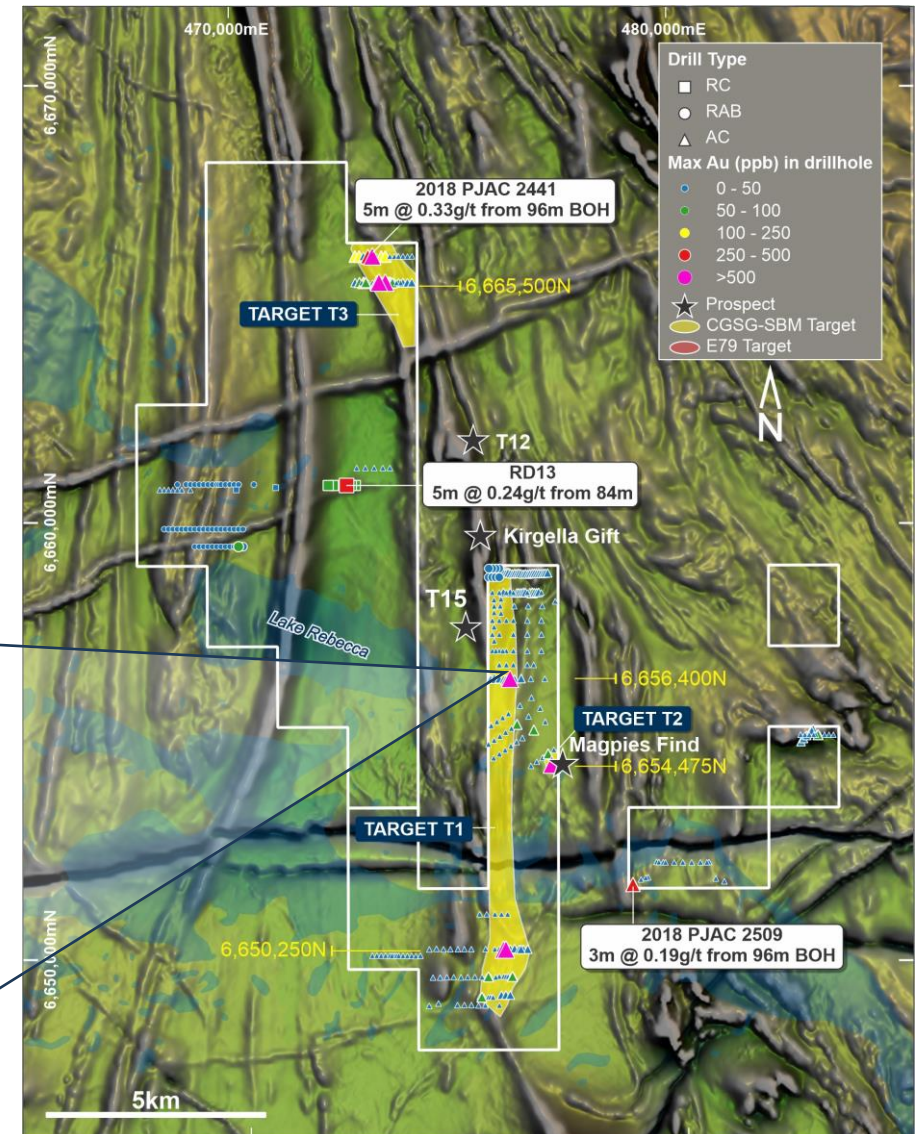

- T1
- T2
- T3
- T4

Kirgella's Gift RC drilling results include:
33m @ 3.10g/t Au from 51m
(Renaissance Minerals Limited, ASX announcement, 11 April 2011)

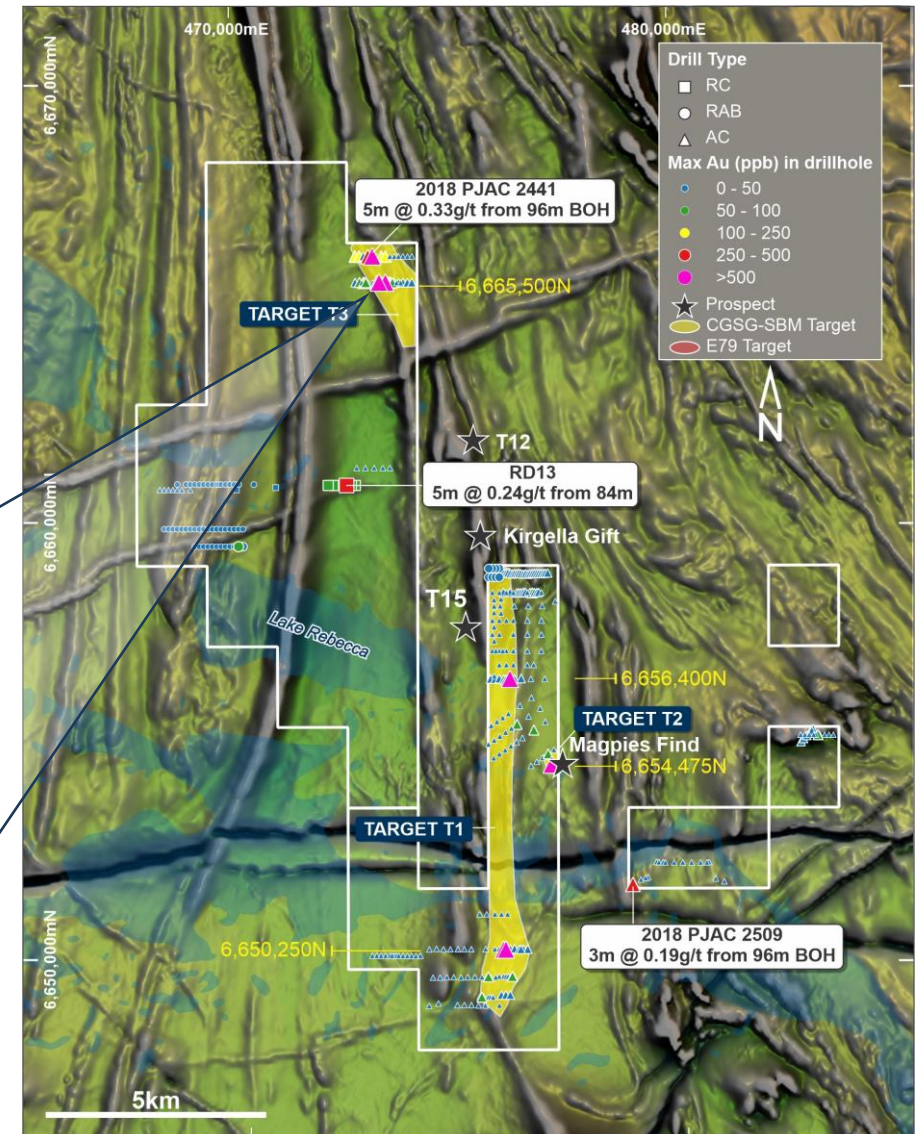

Target 1- St Barbara JV (south tenements)

- 10+ km long stratigraphic target
- Historic drilling shows mineralisation
- Not followed up

Target 3- St Barbara JV (south tenements)

- 600m long, 300m wide zone of anomalous drilling results
- Open to the south
- Not followed up

Target 4- St Barbara JV (north tenements)

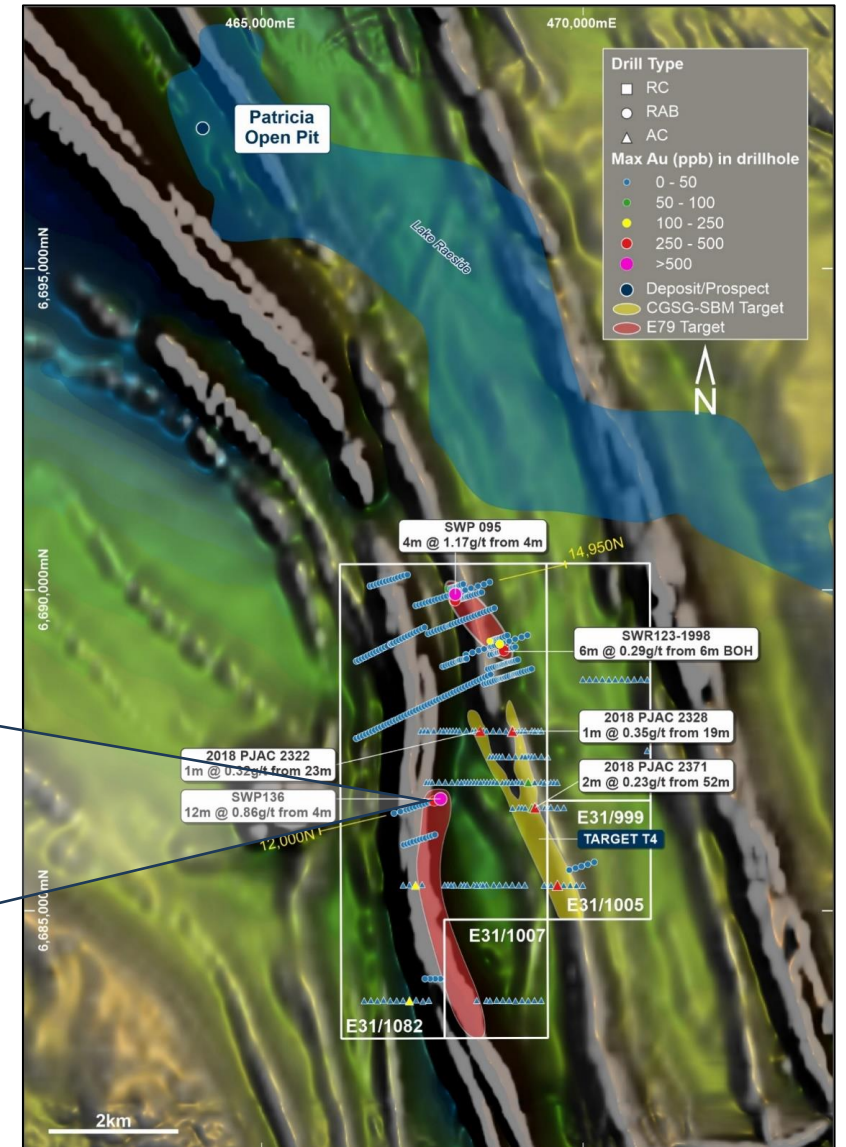

Shallow gold

Mineralised to EOH

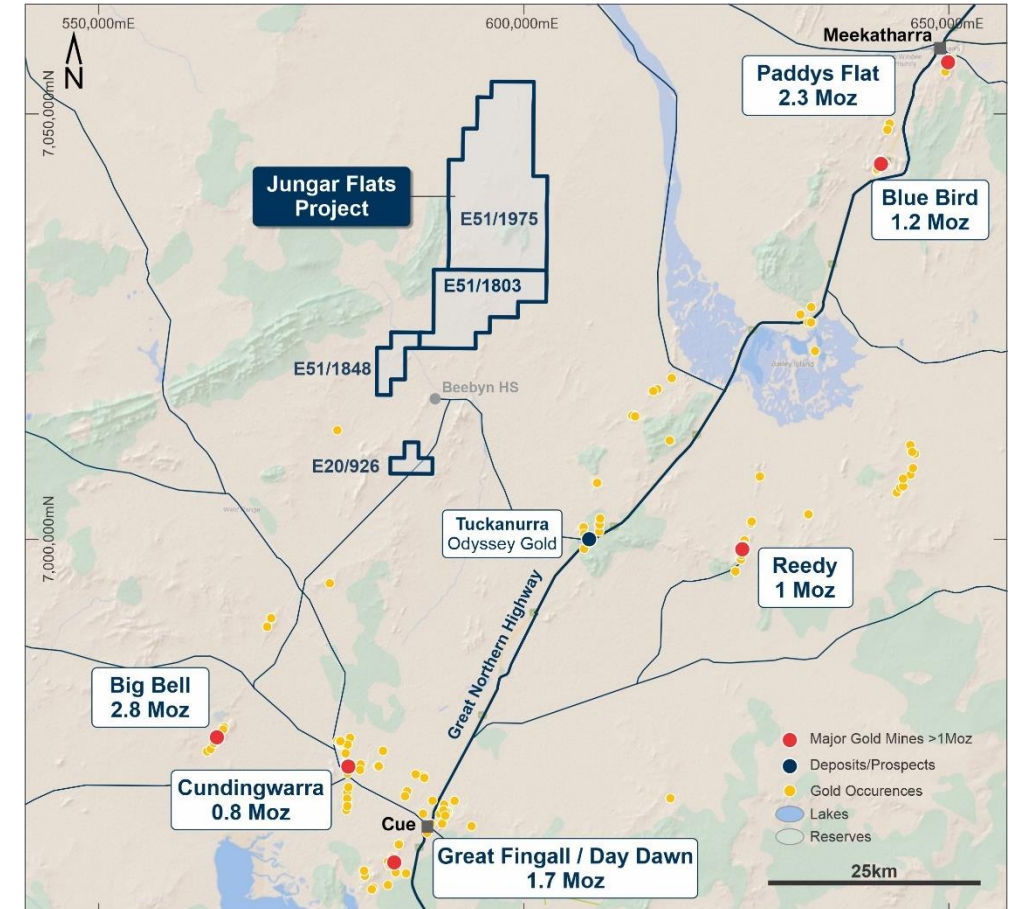

Not followed up

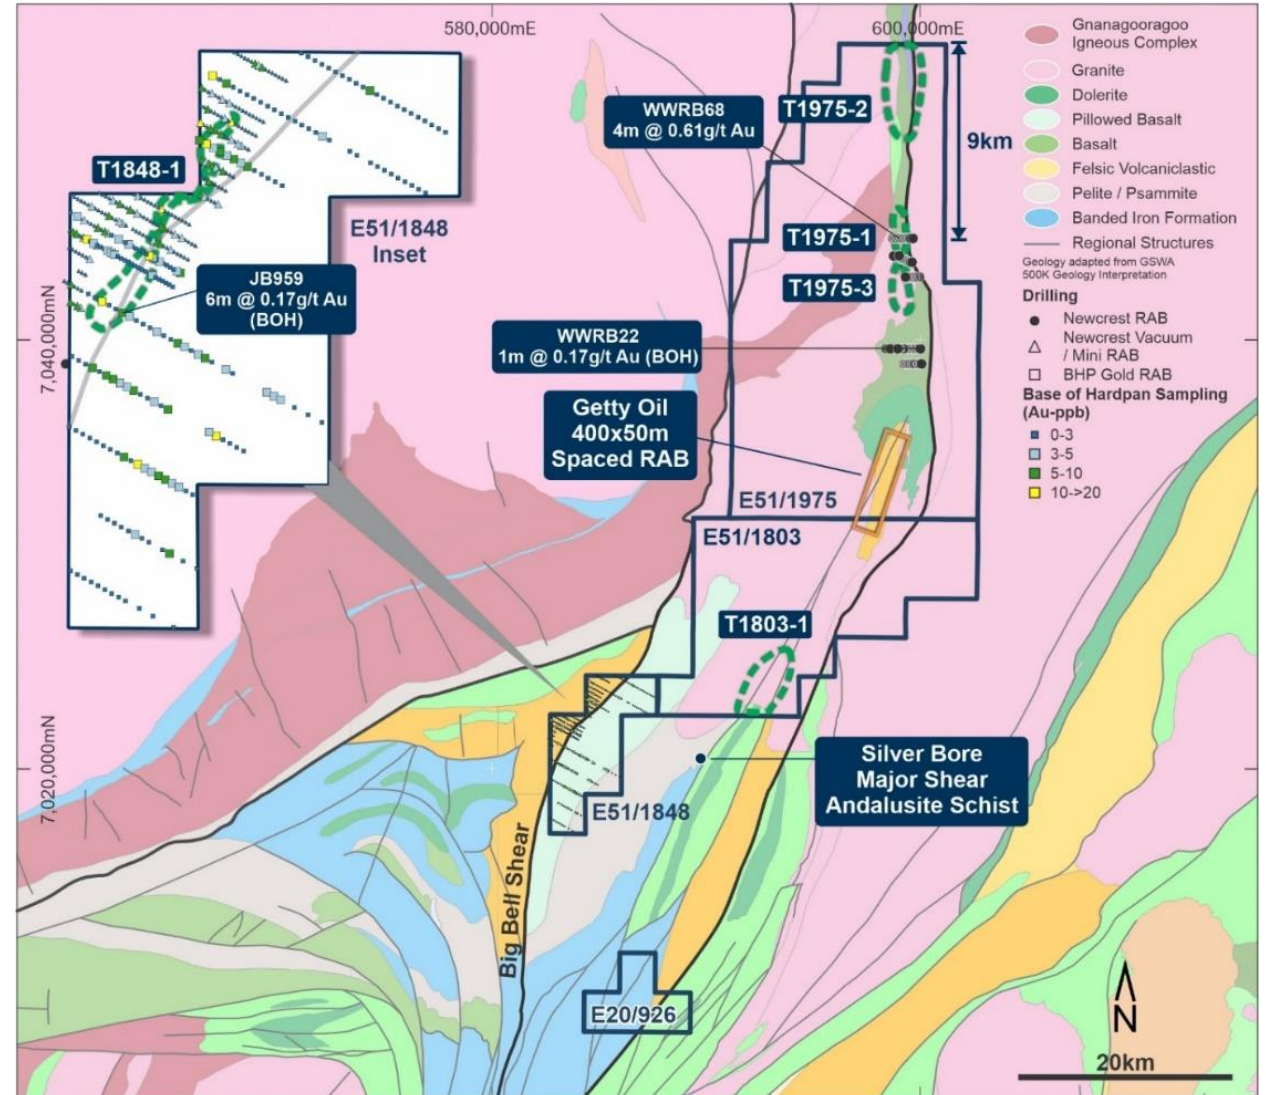

Murchison Project - Jungar Flats

-  337km² of tenure
-  Murchison Goldfields >30 million ounces
-  ~50km of strike along the Big Bell Shear and associated structures

Jungar Flats Project

- Walk-up drill targets include:
 - 6km-long gold anomaly (BHP) – best 6m @ 0.17g/t Au, lack of follow-up
 - T1975-1,2 & 3 (Newcrest) – best 4m @ 0.61g/t Au
- Extensive hardpan cover – most surface geochemistry exploration methods (eg. soil / auger sampling) not effective

The Recipe

- Good management – track record of discovery and successful development
 - 2008 Explorer of the Year (Integra Mining)
 - 2010 Miner of the Year (Integra Mining)
 - 2020 Craig Oliver Award Winner (Stavely Minerals)
- Good ground – two sizeable projects in prolific ‘world-class’ greenstone belts
- Good Strategy – ‘money in the ground’, applied technology in exploration leading to discovery
- Shareholder value – a history of delivering for shareholders
